Proc. Natl. Acad. Sci. U.S. A. 99:16899-16903(2002).
-I- FUNCTION: Involved in IIIR-induced NF-kappa-B (NFkB) well as the activation of mitogen-activated protein pathways. Phosphorylates IRAKI (By similarity).
-I- SUBUNIT: Interacts with TRAF6 and IRAKI (By similarity).
-SUBUNIT: Belongs to the Ser/Thr protein kinase fa
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DOMAIN

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       DB seq
